SUMMARY PROGRAM OUTLINE DRAFT (JUNE 5TH)

OVERALL OBJECTIVE OF THE FORUM

To advance the integrity and coordination of water stewardship, helping to pave the way for scalable uptake and significant impact

THEME OF THE FORUM

AWS Water Stewardship: Building Participation and Ownership; Maintaining Credibility

Day 1: November 1st

Theme for Day 1: Understanding the role of AWS in the global water stewardship landscape

Time	Session	Objectives/breakout topics	Format
09:00-09:15	**Welcome address**	Welcoming participants Summarizing AWS status/progress	Plenary remarks
09:15-09:30	**Key note addresses**	Scene setting	Plenary remarks
09:30 - 11:00	**The state of water stewardship**	Neutral introduction to the water stewardship landscape for newcomers	Presentation of research findings Panel discussion with Q&A
11:00-11:30	**Break**		
11:30 -13:00	**Learning from implementation of AWS Standard**	Share lessons learned (positive and negative) from implementation of AWS Standard	Presentation of case studies Panel discussion with Q&A
13:00-14:00	**Lunch**		
13:15 – 13:45	**Lunchtime "brown bag session"** (in parallel with lunch) AWS Standard implementation masterclass	Share specific experience from supporting the implementation of the AWS Standard	Interview with leading figure in AWS water stewardship to highlight key lessons supporting implementation in diverse contexts. Audience Q&A
14:00-15:00	**Connecting local and global part 1**: Breakout sessions	Set the scene for the regional-to-international discussions by focusing on three key areas for **promotion** of water stewardship	
	Breakout session 1: **Water stewardship in supply chains**		
	Breakout session 2: **Water stewardship in investments**		
	Breakout session 3: **Water stewardship in catchment management**		
15:00-15:30	**Break**		

15:30-16:30	**Connecting local and global part 2**: Building regional AWS networks	Share regional perspectives Understand what infrastructure needs to be built at regional levels Inform evolution of local-to-international relationships within AWS	Plenary discussion amongst regional representatives with Q&A
16:00- 17:15	**Connecting local and global part 3**: AWS and key international development processes	Using results of previous session to help understand how AWS can support key development processes and/or initiatives	Plenary session
17:15-17:30	**Summary of day 1**	Summarize outcomes of day 1 Prepare participants for day 2	Plenary
17:30-18:30	**Drinks reception sponsored by Diageo**	Networking Learning from Diageo implementation	Short presentation from Diageo

Day 2: November 2nd

Theme for Day 2: Strengthening the AWS system

Time	Session	Objectives / breakout topics	Format
09:00 – 09:30	**Recap of day 1 and introduction to day 2 program** **Introduction to AWS system**	Recap day 1 outcomes Set scene for day 2 Ensure adequate level of understanding of AWS system by participants	Recap day 1 findings and seek audience ideas Presentation on AWS system
09:30-10:45	Breakout sessions: **Creating coherence**		
	Breakout 1: **Advancing coordination between AWS and other water initiatives**		Workshop
	Breakout 2: **Advancing collaboration between AWS and other standard systems**		Workshop
	Breakout 3: **Understanding how natural capital accounting and water stewardship can be mutually beneficial**		Workshop
10:45-11:15	**Feedback on Creating Coherence breakout sessions**	Advance coherence in water stewardship and related initiatives	Plenary presentation from breakout convenors Facilitated discussion on using outcomes of breakouts
11:15-11:45	**Break**		
11:45-12:45	**Developing AWS as a global platform for water stewardship knowledge**	Better understand how to develop local-to-global learning pathways.	Plenary session using results of “creating coherence session” to help join the dots on how AWS engages locally and knowledge is transferred to international processes
12:45- 13:45	**Lunch**		

13:00-13:30	**Lunchtime "brown bag session"** The Hydro Nation and Scotland's role in advancing water stewardship (TBC)		
13:45-15:00	**Access to socially robust information for AWS Standard implementation**	Draw out practical insights on how to generate socially robust info systems at level	TBD
15:00- 15:15	**Break**		
15:15 – 16:30	**Strengthening the AWS business case**	Improved understanding of how increase participation in AWS water stewardship	TBD
16:45-17:15	**Closing session**	Summarize Forum outcomes and outline next steps
